National Lead Poisoning Prevention Week 2020

#NLPPW2020 #LeadFreeKids

NATIONAL LEAD POISONING PREVENTION WEEK WEBINAR PROGRAM

Welcome!

Each year, the National Lead Poisoning Prevention Week (NLPPW) outreach campaign is aimed at awareness, action, and prevention. We bring together individuals, diverse organizations, industry, and state, tribal, and local governments nationwide. NLPPW is held this year from October 25-31, 2020.

We thank our presenters for their work, support of and presentations during NLPPW. The target audiences for our webinars are a wide spectrum of professionals, who we hope will join us, ask questions, and most importantly, benefit.

NLPPW highlights the many ways parents can reduce children's exposure to lead in their environment and prevent its serious health effects. The U.S. Department of Housing and Urban Development (HUD), the U.S. Environmental Protection Agency (EPA), the Centers for Disease Control and Prevention (CDC), and our partners work to heighten awareness of lead poisoning, provide resources, and encourage preventive actions during NLPPW and beyond.

More information can be found at https://www.hud.gov/program_offices/healthy_homes/nlppw

The support of our partners helps us reach target audiences and broadens the range of techniques for educating families and individuals.

AT A GLANCE SCHEDULE

Date	Time (EDT)	Webinar
Monday, October 26 th	11:00 am	<i>Running a Successful Program / Overcoming Barriers in your Lead Program</i>
Tuesday, October 27 th	11:00 am	<i>Renovation, Repair and Painting Rule - Contractors</i>
Wednesday, October 28 th	11:00 am	<i>Decline in Blood Lead Testing in Young Children Following the Onset of the Pandemic / Lead Poisoning Prevention Efforts During COVID-19</i>
Wednesday, October 28 th	2:00 pm	<i>(Spanish Webinar): Role of lead prevention and remediation in health / Keys for lead poisoning prevention during the COVID-19 pandemic</i>
Thursday, October 29 th	11:00 am	<i>Lead Hazards and Housing Discrimination</i>

REGISTRATION INFORMATION

Please read over the short description of each webinar, presenter, and target audience. To attend a webinar, follow the link below each webinar to register. **You must register for each webinar you plan to attend.** Registration is limited to the first 500 registrants, so please plan on registering early. Once you have registered, you will receive confirmation by email, including instructions for connecting to the webinar on the day of the event. If you have any technical questions or concerns about registering for, or attending a webinar, please contact Michael Goldschmidt, Director of the National Healthy Homes Partnership at goldschmidt@missouri.edu.

We look forward to your attendance and participation at our webinars!

MONDAY, OCTOBER 26, 2020 – 11:00AM

RUNNING A SUCCESSFUL PROGRAM / OVERCOMING BARRIERS IN YOUR LEAD PROGRAM

Presenters: **OLHCHH Grantees** Margaret Williams, Senior Lead Program Specialist/Program Coordinator, will present *“Running a Successful Program”*. Sonya Frick, Unit Manager, Lead Safe Home Program, Michigan Department of Health and Human Services, will present *“Overcoming Barriers in Your Lead Program”*.

Margaret Williams: She describes on how the State of Vermont has worked to protect occupants for over 20 years from lead-based paint hazards through the Vermont Lead Law and how the City of Burlington has been reducing in home hazards for over 15 years and has strengthened the VT Lead Law compliance in the City. She will review marketing techniques that have worked and ones that have not. Some of the barriers the Program has had to overcome and opportunities for the future.

Sonya Frick: In the State of Michigan (SOM), elevated blood lead levels in children and pregnant females is a problem in older housing stock built before 1978. This webinar will provide background on how to manage a lead program, overcoming barriers, using resources to achieve your goals and maintain success in running/administering a lead program to abate lead hazards across the SOM.

- Target Audiences: OLHCHH grantees; HUD and OLHCHH field staff; Federal agency staff with related programs; Community-Based Organizations, Health care providers, Healthy Homes educators.

TUESDAY, OCTOBER 27, 2020 – 11:00AM

RENOVATION, REPAIR AND PAINTING RULE

Presenter: Mike Wilson, Office of Chemical Safety and Pollution Prevention, Environmental Protection Specialist, U.S. Environmental Protection Agency, Washington, DC

- Target Audience: Contractors, Renovation Firms, Painters
- Webinar Description: EPA's Lead Renovation, Repair and Painting Rule (RRP Rule) requires that firms performing renovation, repair, and painting projects that disturb lead-based paint in homes, child care facilities and pre-schools built before 1978 have their firm certified by EPA (or an EPA authorized state), use certified renovators who are trained by EPA-approved training providers and follow lead-safe work practices. This webinar will provide a brief overview of the rule specifically for contractors and provide information on how contractors may enroll in training course to become lead-safe certified to work on homes to protect children.

WEDNESDAY, OCTOBER 28, 2020 – 11:00AM

DECLINE IN BLOOD LEAD BLOOD TESTING IN YOUNG CHILDREN FOLLOWING THE ONSET OF THE PANDEMIC / LEAD POISONING PREVENTION EFFORTS DURING COVID-19

Presenters: Joseph Courtney, Ph.D., Senior Epidemiologist/Team Lead for Surveillance and Epidemiology, Lead Poisoning Prevention Environmental Health Tracking Branch, Division of Environmental Health Science and Practice, National Center for Environmental Health, Centers for Disease Control and Prevention. Our second presentation is *“Lead Poisoning Prevention Efforts During COVID-19”*. Neasha Graves, MPA, Environmental Health Outreach Manager, Center for Public Engagement with Science, UNC-Chapel Hill Institute for the Environment

- Target Audience: State and local health departments, environmental health organizations, pediatric healthcare providers.
- Webinar Description: This session will focus on how the COVID-19 pandemic has affected lead poisoning prevention work. The presentations will provide an overview of the difficulties state and local health lead poisoning prevention programs are encountering as a consequence of the pandemic and the effects seen on blood lead testing.

WEDNESDAY, OCTOBER 28, 2020 – 2:00PM

(SPANISH WEBINAR): ROLE OF LEAD PREVENTION AND REMEDIATION IN HEALTH / KEYS FOR LEAD POISONING PREVENTION DURING THE COVID-19 PANDEMIC

Presenters: Our first presenter is Gredia Huerta-Montanez, MD, FAAP, Vice President, Puerto Rico Chapter, American Academy of Pediatrics (AAP); Consultant and environmental champion, EPA Region 2, Pediatric Environmental Health Specialty Unit (PEHSU). She is followed by Martha Rivera Rosa, MEH, TSCA Lead Inspector, Caribbean Environmental Protection Agency, Region 2, Guaynabo, Puerto Rico.

Gredia Montanez: The aim of this presentation is to discuss how every professional involved in lead prevention and remediation plays a crucial role in improving the health outcomes of families at risk.

Even at low levels, lead can cause irreversible adverse health effects in children, especially among those younger than 6 year of age. Lead intoxication in children is completely preventable and yet each year thousands of young children in the United States are exposed to this toxicant in the places where they grow, learn and play. We are living trying times in which children are at higher risk for multiple potentially adverse environmental exposures including those related to extreme weather events, air pollutants and emerging infectious diseases. These threats call for effective and consistent efforts with a holistic approach to better protect our children. Lead poisoning prevention requires the collaborative effort of federal, state and local public health agencies, lead abatement inspectors and risk assessment contractors, children’s primary physicians, nurses, other healthcare specialists and therapists, health educators, social workers, and the daycare or school systems cognizant of the social determinants of health

Martha Rivera: *“Keys for Lead Poisoning Prevention During the COVID -19 Pandemic”*. She will discuss the risks faced by families, especially children, of being exposed to lead during the COVID-19 pandemic.

- Target Audiences: OLHCHH grantees; HUD and OLHCHH field staff; Community-Based Organizations, Health care providers, and Healthy Homes educators.
- Webinar description: Due to COVID-19, we are all spending much more time at home. Moreover, this has increased the number of Do-It-Yourself (DIY) projects such as repairs, renovations, and/or painting which rises potential exposure to lead hazards. This webinar will provide you the tools to learn about lead poisoning at home and how to prevent it.

THURSDAY, OCTOBER 29, 2020 – 11:00AM

LEAD HAZARDS AND HOUSING DISCRIMINATION

Presenter: Tzeitel Andino-Caballero, Deputy Director, Region II Office of Fair Housing and Equal Opportunity of the U.S. Department of Housing and Urban Development

- This topic will discuss the intersection between environmental justice, lead hazards and fair housing rights.
- Target Audience: OLHCHH grantees; HUD and OLHCHH field staff; Federal agency staff with related programs; Community-Based Organizations, Health care providers, Healthy Homes educators, and HQS and REAC inspectors.
- Webinar Description: An overview of fair housing laws and federal anti-discrimination protections will be provided with a special focus on the detrimental impacts that lead hazards have on disabled individuals (handicap) and families with children (familial status). Case scenarios illustrating the intersection between environmental justice, lead hazards and fair housing rights will be discussed. Attendees will also become familiarized with HUD’s complaint process.
